

## Supported

- Know solid solution that's works
- With these we will deliver the solution with options required, i.e. tune and EGR, etc
- If there are problems it's almost certainly down to the vehicle, sensors or failure to undertake correct diagnostics and resets, but we will look at any redo's to help resolve

## Unsupported DPF solution

- Known to have some problems
- And/or is an un-ideal blanket code delete solution
- We will supply a file to your spec, plus a we will supply a DPF off *only* file at the same time. If we know there is problems with associated tunes, we will just supply a DPF off.
- If there are any problems with the vehicle, try on the DPF only file. There will be no further support, or redo's. If still not OK, return to org and then apply for credit.

## No DPF Solution

- Solutions know to always have problems, so will not be able to supply a file for these vehicles
- And/or are Euro 6 emissions vehicles. Asolutions, so in these cases, we are not able to supply either a DPF nor AD-Blue solution.
